## Forest Fire Prevention is Everybody's Business

New Hampshire faces a continuing challenge in its forest fire problem - 97 percent of all our forest fires being man-caused and preventable - a serious indictment of interest in our own welfare and that of our neighbor. Both the State and the towns are striving diligently to effectively meet the challenge through education of the public to the threat fire presents to our woodlands; by maintaining a well trained corps of wardens and deputy wardens in every community and by providing ample opportunity for all who wish to dispose of unwanted waste materials. Careless and perverseness, however, continue to be the big hurdles.

Thoughtlessly discarded lighted cigars, cigarettes and matches from moving vehicles, by hikers, hunters and fishermen; careless burning of debris during hazardous periods, in dangerous locations; illegal burning; improperly extinguished debris, camp and cook fires- all result in serious loss of property, disruption of industry and farm work and unnecessary expenditure of town and state funds.

To meet the challenge successfully, the state, your community and your local forest fire warden need YOUR thoughtful and cooperative effort - The rules are simple.

1. Don't burn at home - use your town dump and avoid all fire problems.
2. If you do burn, be sure to secure a written permit from your local forest fire warden when the ground is not covered with snow. Permits are required for open debris fires, home incinerators, outdoor fire places and camp fires. Your warden is instructed to permit burning if weather conditions, site and type of burning are safe.
3. Be sure that all lighted material - cigars, cigarettes and matches - are completely out before discarding them. Use ash trays in automobiles.
4. Make certain that your debris, camp and cook fires are completely out before leaving them.
5. Insist that others be careful and comply with burning requirements.
6. Call the warden promptly when fire is detected and aid him to extinguish it.

REMEMBER - the fire you prevent might be the one which could burn YOUR property.

REMEMBER - Forest Fire Prevention is Everybody's Business and our Most Important Undertaking.

**(B) SUPERINTENDENT JASON E. BOYNTON'S REPORT**

It is not possible for the writer to provide a detailed report regarding the accomplishments of the Barnstead School District for the school year being reported since he has only been the Superintendent of Schools since December, 1957.

Your Superintendent has benefitted from the orientation given him by Superintendent John W. Day and wishes to make it a matter of record that he is grateful to Mr. Day for the opportunity to work closely with him, especially during December of 1957.

The members of the Barnstead School Board have indicated their acceptance of the new Superintendent as a co-worker and as a friend. The teachers have had little opportunity, as yet, to become acquainted, but the writer feels confident that all individuals concerned will work together well and to the best interests of the school age citizens of Barnstead.

The new school is likely to be placed in use during the month of March, however, the availability of certain materials and fixtures may possibly cause some delay.

The well planned building is an outstanding accomplishment. The writer hopes that all the voters will take advantage of the opportunity of visiting the new school and see first-hand the educational plant which will benefit youth and indirectly our national security.

The writer pledges to give his best efforts to the duties of Superintendent of Schools and is looking forward to becoming acquainted with the residents of Barnstead.

## PART V. AUXILIARY REPORT

### Report of the School Nurse

To the Townspeople, School Board and Superintendent of Schools of Barnstead:

The following is my seventh Annual Report of the school health work of Barnstead:

In the Spring and Fall of 1957, we had a few cases of the mumps, and in the Spring quite a few cases of throat infections.

As of the Autumn of 1957, the Flu reached the borderline of an epidemic stage, causing almost 50% absenteeism among pupils and teachers. Of course, with the nation-wide scare of the Asian Flu, the public was alert and took intelligent precautions which helped us in this area to get well quickly. Any complications caused by the Flu among the school children are without my knowledge to this date.

In 1956—1957 I used ten health films as visual aid in my Health Education Program in the classrooms, followed by discussion.

The routine school nursing work will be found in the statistical report.

It has been a dramatic year in the Barnstead School's history. To those who have worked so hard to improve our school facilities so that our children may have a decent school and healthful environment, on behalf of your School Health Service, a big Thank You!

Your School Health Service is a broad field. It seems that the biggest issue discussed at our nurses meetings is how to approach the education of our physically and mentally handicapped children. This problem exists in all our schools and the burden is put on our teachers.

Mentally and physically handicapped children need special help in their education. I am asking the School Board, the Superintendent and the Townspeople for assistance in solving this problem.

In closing, I wish to express my appreciation to parents and teachers and all others who have helped with the school health program.

I am always glad to see or hear from parents at any time regarding their children or pertaining to the health of the school.

Respectfully Submitted

ANNIE L. ROSENQUIST, R. N.  
School Nurse Teacher
